Windows, Doors & Conservatories

Introducing Mitre Master

When you choose Mitre Master, you are investing in timber products of the finest quality, manufactured to the highest standards.

Made from wood carefully selected from verified, legal and well managed forests, every Mitre Master door, window and conservatory combines traditional craftsmanship with the latest developments in timber engineering. This unique blend of ancient and modern ensures the aesthetic appeal of our products is matched by stability and durability not normally associated with timber products.

Backed by Timbmet, one of Europe's leading innovators in the effective application of timber, and market leader in its commitment to environmental sustainability, every product in our extensive range is constructed from a unique mitred jointing system, designed to give you peace of mind and an elegance and beauty that only wood can deliver.

Trends like PVCu and aluminium come and go, but wood will always be the first choice for anyone wanting to add authenticity to their home. Wood is not poured into a mould like plastic, rolled or formed like molten metal and it certainly isn't mixed from chemicals.

Its distinctive appeal comes from its diverse origins. All trees are affected differently by the climate, the elements and the local ecosystem of which they are a part, giving each a unique character and attraction. The colour and grain in the same tree can also vary depending on the way the mill slices through the tree.

Once transformed by craftsmen, this varied and flexible material can always be relied on to produce a stunning effect. Using knowledge and imagination, we've created new ways to bring out the outstanding beauty of wood - producing a range of windows, doors and conservatories that's guaranteed to enhance your home and lifestyle.

The beauty of real wood

There is no better way to put a welcoming heart into your home than with the traditional beauty of real wood. Elegant, fashionable and versatile, the appeal of timber is natural and timeless.

Craftsmanship of the highest quality

Our promise to you is a finished construction that complements the aesthetics of your home and delivers a vast range of practical benefits, including the ability to maintain its distinctive appearance in the face of the elements.

Conservatories

You'll be proud to own a Mitre Master conservatory. Attractive, distinctive and affordable, this is craftsmanship of the highest quality. We know you have your own, personal vision of your ideal conservatory and our bespoke design and manufacturing service will turn that vision into reality.

Your Mitre Master conservatory is made to your exact specifications and - to guarantee the highest performance standards - all our timber is treated with modern, microporous stains to produce a perfect, personalised finish. Our durable hardwood, sourced from sustainable forests and engineered for stability, prevents any distortion and ages beautifully.

Whatever your reason for investing in a conservatory, timber is the best choice you can make. Throughout your installation, we'll be there to advise and guide you. From the detailed planning to the last drop of stain, you'll appreciate our commitment to excellence and the benefits of the technically advanced Mitre Master system.

You may want a reading room, a study, a lounge, a dining area, an orangery or simply a place to relax. Picture it now and let Mitre Master make it real.

Windows

Available in as many styles as your imagination can create, our range of casement, tilt and turn and vertical sliding sash windows are manufactured to the highest specification and feature slim, highly engineered wooden frames with strong weather-proof sealing. Everything is tailored to your precise requirements and using a specialised microporous stain, you can opt for the colour that best suits your property.

Tailored to your precise requirements

For insulation and eye-catching design, nothing beats timber windows. Drawing on cutting edge technology and classic design, Mitre Master brings you the comfort, convenience and security every home deserves.

Of course, there's more to replacement windows than appearance, even for windows as stunning as ours. Warmth, noise reduction and security are all outstanding features of a Mitre Master window. That's why you'll find 24mm double glazed, sealed units as standard and for peace of mind, key or finger operated sash locks fitted to every window. Resisting the weather as well as intruders, Mitre Master units are built to be phenomenally hard-wearing and watertight.

Safe, reliable and custom-made, Mitre Master windows have a beauty of which you'll be proud for years to come.

Each door is individually made with amazing attention to detail

Individually crafted from sustainable timber and coated to protect against warping and weather damage, you can be sure Mitre Master doors will give you and your family a warm welcome every time you use them.

Doors

When visitors arrive at your home, first impressions really count – and a Mitre Master door is never anything less than impressive. The perfect partners to our wooden windows, Mitre Master doors are built to the same exacting standards. Each door is individually made with amazing attention to detail – like in-line sashes and matching arch heads. Tilt and slide patio doors, sliding/folding doors, residential doors and double doors – all have security and style as standard.

Ideal for conservatories and patios, every door can be fitted for inward or outward opening and is strengthened with simple-to-operate, multi-locking espagnolette bolts. In fact, you'll quickly appreciate just how much thought has gone into all the hardware – particularly the strong, adjustable hinges.

Even if you're faced with a non-standard aperture, Mitre Master steps into the breach with style, convenience, performance and security.

The perfect choice

As a homeowner, you want the best for your home. Surprisingly low maintenance, with no detail overlooked and manufactured with the individual care of real craftsmen involved at every stage, Mitre Master windows, doors and conservatories are durable, attractive and robust. Bringing ingenuity to construction and beauty to life, they're the ideal addition to any home – especially yours.
